(54) WARMING-UP CONTROL DEVICE FOR HYBRID ELECTRIC AUTOMOBILE

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a warming-up control device for a hybrid electric automobile quietly warming up an engine for actuating a generator while elongating the life of the engine.

SOLUTION: When the temperature of the engine is a set temperature or less after starting the engine for actuating the generator (S12), the load of the generator is controlled and the output of the engine is controlled according to the load of the generator so as to hold the rotation speed of the engine (S16, S20).
